**Module M.EuCu.26: Eurocompetence II: Project Management**

**Learning outcome, core skills:**
This is the second of three seminars in the "Eurocompetence"-scheme. The competences acquired in "Eurocompetence I" are to be used in this module on project management.

The goal of the "Eurocompetence II" module is the integration of academic and professional training within the Euroculture Programme, a start in which has been made during the first Eurocompetence module.

It aims to further develop skills that are of particular interest with regard to entry into the labour market: language and inter- and multicultural skills, communicative competencies, teamwork, the capacity for critical analysis and research, and the dissemination of the results of project work.

In order to achieve these objectives, a main part of the Eurocompetence II module is the execution, management and evaluation of an independent group project run by the students (for instance excursions). The key approach to this module is therefore trans-disciplinary, problem oriented and practical.
